

# Everglades Uprising! 2009

New Year  
Celebration,

## Winter Conference and Action Camp

→ in INDIANTOWN, MARTIN COUNTY

Three days of forums, workshops and trainings

DEC 31 - JAN 2

Two weeks of actions, monitoring camps, and eco-outings

JAN 3-17

ONE EVERGLADES bioregion, united in exposing and attacking the Energy Empire in South Florida.

Forums:

### -The Energy Empire vs. the Everglades

addressing gas, nukes, off-shore drilling, incinerators, climate change, etc.

### -Restoration: muck-raking through swamp politics

talking flow ways, reservoirs, mining, skyways, climate change, scandal, corruption in the biggest ecosystem recovery project on the planet

### - Direct Action Training

road blockades, tree climbing, construction and use of lockdown devices, banner hangs, street theatre, media work, legal support and logistics planning for kick-ass civil disobedience and other forms of direct actions

### -Environmental Justice in South Florida

exploring the intersections of white supremacy and ecological devastation; improving solidarity with local organizations addressing issues related to environmental injustice (such as: land rights/housing, immigration, pesticides, toxic pollution, climate change, etc)

**Action & Monitoring Camps** may include visits to some of the following energy infrastructure sites:

- Liquefied Natural Gas (LNG) facilities in Indiantown and off-shore Broward;
- West County Energy Center & Gulfstream gasoline in the Loxahatchee area (the one we've been fighting);
- Barley Barber power plant in Martin County;
- Treasure Coast Energy Center in St. Lucie County;
- Florida Gas Transmission (FGT) pipeline route that will go from North to South Florida;
- Turkey Point & Hutchinson Island Nuclear Power Plant (both proposed for expansions)...

Other ongoing battles that we would like to lend support for include: multiple anti-road campaigns in the Northeast Everglades region; the growing fight against Lowes destruction of Coconut creek wetlands, Broward County; and a possible throw-down at Lake Worth beach against a reef-killing dredge project.

BRING GEAR  
CAMPING AND  
FOOD FOR A COMMUNITY  
KITCHEN!
